CENTLEMENT—In response to the solicitation of a number of prominent gentlemen residing in the different settlements of your Electoral District to offer myself as a candidate to represent your interests in mature. election.

The measures that a member of the inse of Commons may be called on to deal with being merent from those of a member of the local legislature, sing in their nature more national, it is doubtiese expected that I as a candidate should advert to at least some of them that more directly concern your interests. I will say, then, that having been one of the earliest advocates of a Canadian Transcontinental Railway, I shall, if elected, consider it to be my paramount during the reference of making it.

der it to be my paramount duty in view of making it a rand national success, to insist that the Terminus shall at Esquimalt, and that the line shall traverse the en-re outh-Eastern Coast of the Island from Johnson Under the Terms of Union with the Dominion, it is the Under the Terms of Union with the Dominion, it is the province of the local legislature, and not of the Dominion Parliament, to decide as to the kind of tariff that the people of British Columbia deem to be best suited to their varied industrial interests, during the next ten years. Should, however, the question come before the Dominion Parliament, I shall endeavor to have the tariff so framed as to meet with the concurrence of the agricultural, mining, and commercial interests of your district.

As the Dominion now possesses exclusively the right to manage our postal and telegraphic affairs, I shall endeavor to secure for the Eastern Coast a bi-weekly mail steamer of a superior class to the one now plying on the

deayer to secure for the same and a superior class to the one now plying on the coast,—and also better mail incilities in each serviement; and as I deem it to be of great importance commercially to have the most rapid means of transmitting intelligence between Nanaimo and Victoria, I shall urge on

gence between Nahaimo and Vigtoria, I shall urge on the Federal Government the importance of the early construction of a telegraph line to connect the two principal towns in the Province.

The increasing importance of the commerce of the Gulf of Georgia renders it necessary to have more Lighthouses. I shall therefore make the most streamous exertions to induce the Federal Government to build a lighthouse at Nanaimo at once, and to erect others elsewhere, as soon as possible, te insure greater safety and certainty in navigating the Gulf.

With respect to the Indians, I will urge that they be settled on Reservations, under the superintendence of Government Agents, where they may, with the assistance of the Government, be taught the arts of civilization, and thus have their social, moral, and religious conditions rapidly improved.

conditions rapidly improved.

The question of the early construction of a Marine Hospital at Nanaimo, I deem to be deserving of serious consideration.

The Fisheries along our coasts premise to become very profitable, and as the Dongidon Government has agreed to extend its protection and encouragement to that valuable and important branch of industry, I will endeavor to secure for your district its full share of any aid that may be appropriated for that purpose.

Not being able at this time to explain my views at greater leight, I will take an early opportunity to meet youlpersonsily and collectively in the different settlements, when I may bring under your notice other questions of a Provincial and Dominional character.

In conclusion, Gentlemen, if you should do me the tions of a Provincial and Dominional character.

ENTLEMEN: While travelling through your de-trict in July hat. I was the recipient of very great encouragement to offer myself as a Candidate for the Parliament of the Dominion, of which this Progreat encouragement to offer myself, as a Candidate for the Parliament of the Dominion, of which this Province-now so happily forms a part.

In soliciting your support at the forthcoming election it becomes my duty to express my views on Bominional politics, having a direct bearing upon the interests of British Columbia, which I shall do as briefly as possible. I shall be a staunch supporter of the present Government of Canadia to long as that Government shall administer the affairs of this Bominion in general, and of this Province in particular, in a satisfactory manner.

Knowing the feasibility of the Canadian Pacific Railroad from personal observation along the greater part of the probable line of route, and having advocated such an enterprise in my Overland Journal, published in Ontario: as well as on this coast for the past twerve years, I shall endeavor, by every means in my power, ito bring that grand undertaking to a successful termination at Equinalt or some other harbor on Vancouver Island.

I may here say that I am not in favor of introducing Coolie labor cither on the Railroad or other public works and will strenuously resist any attempt in that direction. Should the Tariff problem not be solved by the Local Legislature; but a modification of the Canadian Turiff, in so far as agricultural produce is concerned, recommended, I shall make every possible effort to secure its adoption by the F-deral Parliament.

I am fully of the opinion that the Federal Government will place mail communication on a thoroughly efficient footing from Sooks to Comox Jong before the re-opining of Parliament: should this however, not be the case I shall, if elected your representative, see to it, that every settlement is duly caree for in this important particular.

The early commencement and completion of a Dr Dock at some Island port, and I think Nanaimo has strong claim upon such a work shall not be overlooked.

I shall advocate Vote by Ballot at Municipal, Loca and Federal elections till that great reform becomes the land. and Federal elections till that great reform becomes the law of the land.

Telegraphy, Lighthouses, Harbor Improvements, Hospitals, Asylums, Penitoniaries, Eisheries, Geological and other surveys, together with the Indian question and other subjects that will be continually presenting themselves, shall have my constant consideration and advecacy wherever conductive to the material prosperity of the Province in general and my constituents in particular.

lar.

I rest my claims upon your support gentlemen, on my long residence in the Eastern Provinces and on this coast; my intimate knowlege from actual travel of the wants of the every agricultural and nearly all the mining districts of the province—my unswerving support of Confederation and the Railrand since '59, and my having no special connection with any particular interests, commercial, agricultural or mining, I am enabled thus to look upon them all from an independent and impartial stand point, and in advocating their best interest to assist in raising this province of almost illimitable resources to the proud elevation it will soon attain as the Western outlet of the Great Dominion.

### The Daily Standard. Friday, September 29, 1871. Dike Law.

During the last session of the Legisdative Council, Mr. Humphreys, of Lillooet, succeeded in passing a resolution to appoint a committee to report on the advisability of making some enactment | WILL DELIVER A SERIES OF LECrespecting diking the delta of Fraser river. The committee was appointed, but for some reason never reported. It is rather a pity that it did not make a SUBJECT TEMPERANCE. report, in favor, at least, of the Government inquiring into the subject during the recess, so as to be prepared to lay before the next Assembly some data to enable it to legislate intelligently on the subject. There is no help, however, for the matter now, -except to take up the subject where it was left off. At that place McRoberts and Armstrong seem ready to begin. In their electoral addresses they promise to labor for a dike, drainage and fence law. Doubtless our fence law may require some modification to suit localities,—but on dikes and and ditches we have no local law whatever. By some freak of language dike means ditch; but the dike to which we refer is not to hold or carry off water, but a mound of earth to prevent Fraser river from overflowing the low lands that form its banks above and below New Westminster. It has been said that a disconsistent of the second process.

The value of the value of the value of the value dike three feet and a half high is ample to keep out the water at the highest tides. If so, the cost of diking will not be very expensive, nor difficult to keep in repair. In the Maritime Provinces of the best lands are diked marshes; but the dikes are generally very high and very costly to construct, and expensive to keep in good condition. But the delta of the Fraser has the advantage, whilst the land is equally good; and the cost of recovery far less. Possibly no district in the Province would equal the Lower Fraser, if its delta were diked and cultivated. In fact, we don't know another tract the Province where so large an agricultural settlement could be formed. Hence the importance of diking out the water along the delta as soon as possible. We presume if a dike law be passed, a commission will be appointed PUBLIC AUCTION to tax each laud holder according to his acreage to make the dike; and if Government has any lands within the diked tract among settlers, that it should con-tribute its share, and take its pay by a higher price for its marsh so recovered. We don't know a single measure that is set forth in the addresses of the New Westminster candidates that equals in importance the dike law; and we hope that, when the members of that district come down to attend to their Legislative duties, they will be supplied with such At 10 1-2 o'clock a. m. make some intelligent legislation on the subject.

## A Deputy Parliament.

Last year, if we mistake not, a committee was appointed by the Imperial House of Commons to report on the best means of pushing parliamentary business through rapidly. Apparently no practical result has followed. The six or seven hundred members still talk and do but little work. The-law making machine has evidently to be improved or necessary long delayed. Stewart Mill, in one of his treatises maintains that the proper use principles, and the balance of the work of law-making should be done by a smaller and more practical body. The Pall Mall Gazette seems inclined to a similar opinion, if one may judge from its ALL KINDS OF LEATHER recent review of the " Session and Ministry." It says :

"The barren results of the Session, now drawing to a close, point to the conclusion that one of the "wants of the age" is a kind of deputy Parliament and deputy Government. whose business it should be to transact all useful legislation, leaving the ornamental part of the affair to the present occupants of St Stephen's and Downing-street. It would he an advantage to the country at the present moment if, when "our statesmen and legislators are off to the moors or the seaside (as the newspapers are never tired of telling us will be the case in another fortnight), real hard-working House of Commons and Government were to take possession of their benches, and without further ado pick up all the useful measures that have been dropped during the Session, and carry them into effect before Christmas. These deputies would waste no time in discussing questions which have been thoroughly sifted by Royal Commissions, and every detail of which is to be found in printed blue books. They would be uninfluenced by personal, social, or party considerations. "Measures, not men," would be their guiding principle. With a hearty good will they would legislate not for their own but for their country's good; and when the chief Houses of Parliament and the chief Government returned in February from their '-relaxation," they would find that the recommendations of the Royal Sanitary Commission had been acted upon, the truck ques-tion settled, the Mines Regulation Bill passed the water companies brought under control, the municipality of London reformed, the army reorganized, a public prosecutor ap-pointed, and a host of sorely needed reforms effected; in fact, the deputies would have made a clear sweep of the shelves in Down-ing-street, the Home office, and Gwydyr House, and the chief Parliament might then enjoy several months of dreary discussion or questions calculated in its opinion to promote its personal glory and add to its well-deserved popularity, while the working deputies might retire into insignificance until the holidays came round again."

A QUERY FROM LANGLEY.

Langley, Sept. 6th, 1871. EDITOR COLONIST;—If you can spare a little space I would like to have you settle a question that has puzzled us simple minded folks up here not a little. It concerns the relative importance of Agriculture and Education. Whether 'tis nobler in the schoolmaster to suffer the slings and arrows of the angry heavens to spoil his hay, or let the young idea shoot itself and—go build a larro.'

hay, or let the young lock shoot lasely and a barn?

The person chiefly interested (in the barn) took the latter view of it; and when the barn was up the hay must be put into it; and the hay being there, the cows must be driven up to eat it, etc., etc., e'c. Some one here has suggested that as the schoolmaster is paid for atterding to the school, he might pay some one for attending to his farm; but it is no more than just to the gentleman to say that he has a soul above such mercenary considerations as that.

Pending the settlement of the question, if you know anyone that wants a schoolmaster cheap—a dead bargain in fact—please refer him to

REPLY. To the Requisitionists and Electors of Esquimalt, ing Metchosin, cooke and Highland. CELEBRATED HADDOCKS

GENTLEMES,—After considerable hesitation, arising from causes which I can easily and I trust satisfactorily explain when the proper time arrives, I unreservedly place myself in your hands as a caudidate for your suffrages at the approaching election.

It is satisfactory to know that great unanmity prevails in the various sections of the colony upon the extension and in provement of Boads and Bridges; upon mail and telegraphic communication, as well as upon education and retrenchment, and I yield to none in an earnest desire to see all those accomplished to their full-est extent and upon their respective merrits.

As a commercial man I will do nothing to retard, but everything to further our maritime interests and free intercourse with our American neighbors and the outer world, and as one who in early life had a deep interest and profited largely by the fisheries of Newfoundland and the trade of the \$t Lawrence, it will be my enseavor to encourage as much as possible for this coast and our harbors those branches of industry which have flourished so long on the coast of the Atlantic.

My early experience as a member of the M resy Harbor Board, or the Old bock Committee of Liverpool, and and as a member of the Pioli's Committee, the Ship Building Committee, the Observatory and Lloyd's Classification Committee, ought to be of some service in the consileration of our harbor approaches, buoys and beacous.

As a prominent member of the Paid Officers Commit-

Pree Grants of Land to accual settlers, and encouragement to Immigration.

The introduction of a general Municipal Law. The abolition of Road Tax and the direct Tax upon Traders. The Repeal of the Civil List Act.

A money appropriation for the building and support of an Hospital in your town.

Any attempt at the introduction of Chinese labor into this Province in direct competition with that of the white race, it will be my duty to oppose.

Restrictive economy in the administration of the Government; and to see that your money is applied to useful public works, and the receipt and expenditure of it fully and satisfactorily placed before the public.

In conclusion, gentlemen, I beg to say that my earnest desire is to see this our Island Home, and the entire country prosperous and progressive, and if you do me the honor of electing me, I shall endeavor to act in such a manner as may reflect no discredit upon your choice, and which shall not disparage your local interest, or the general welfate of the Province.

I have the honor to be, gentlemen obediently yours

JOSEPH WESTROP CAREY.

ENTLEMENT—I sk the honor of being elected to the seem of the consideration of our civil List Bill and the exercise of that power which one Act of Parliament can exercise of that power which one Act of Parliament can exercise of the chectors of the elector of the elector of the elector of the electors themselves, than in any assertion of principles and the technicalities which ought to other electors themselves, than in any assertion of principles or the attraction of promises.

Permit me, instead of the display of promies to state generally what I consider to be some of the most important duties of your representative, and which I feel will be mine, if honored with your confidence.

The construction of Roads and Bridges throughout your District, especially the building of a bridge across the rawine to connect both sides of your town, and the formation of a Trunk Road to connect Nanaimo with Victoria, the Capital of the Province, and thus open up to a first the capital of the Province, and thus open up to a first the capital of the Province, and thus open up to a first duty.

It will be my duty to aim at a fixed, regular, and more frequent Steamboat Communication between the two Towns.

The great question of Education should engage the attention of every parent, and I believe it to be the duty of this Island, and your District in particular is a first duty.

The great question of Education should engage the attention of good morals and the highest security to the rights of property. I will advocate measures to such an end. My duty too, will be to advocate the following measures:

The immediate adoption of the Canadian Tariff.

Vote by Ballot, and a Residence Qualification of Voters. Tax upon wild agricultural Lands held by speculators. Free Grants of Land to acual settlers, and encourage ment to Immigration.

The immediate adoption of a general Municipal Law. The abolition of Road Tax and the different Tax upon Traders.

The immediate ad

the Dominion tariff will be altered and universally adopted, but in the meantime let us try to profit by our own as long as we may.

The clearing and cultivation of the land give employment to the industrious classes and wherever your corn is produced thither must your plowman and your reaper your shovel and your capital go.

One herdsman and a narrow trail are sufficient for many hoofs, but it requires the handicraft so make a mill and industrious hands to keep it going.

And while I am aware that many other important and debatable questions will soon be brought forward, I can see no necessity for hoisting party colors and will follow no uncertain sound. I have no confidence in those who anticipate the day when the gross delusions of Communists will prevail. I am for building up and not for pulling down. I will neither work nor maneuver for spoil and therefore have no plunder to offer. I will favor no monopoly, but encourage every individual and private enterprise with a hearty and healthy cooperation of every interest for the general good, and on these principles I am prepared to stand or fall.

If called upon to serve you I will do it disinterestedly and faithfully. With unfeigned thanks for the requisition that is before me,

I have the honor to be

says :- An annual return shows that in the year ending 30th September, 1870, there were 32,623 licences paid for by common brewers, the total licence duty paid being £388,389. One licence was for brewing 550, 000 to 600,000 barrels, one for 600,000 to 650,000, and one for 650 000 to 700,000 barrels, the duty paid in these three cases, with supplementary charge or deduction, being re spectively £7,878 £7 582, and £9,155. There were in the United Kingdom in the year above-mentioned 98,652 licensed victuallers. 44,488 persons licensed to sell beer to be classes being in England and Wales, and the 644 in Scotland, 16,105 in Ireland. In the same year 526,946 barrels of beer, of the de-West Indies, 24.300 to the United States, 14,-074 to Brazil, 12,432 to Chiua, 11,944 to Gibraltar, 10,985 to South Africa.

VANDALISM .- Apparently nobody has charge of Beacon Hill Park. Within a few days shot was fired. some one has been engaged in digging and some one has been engaged in digging and I was out shooting last Monday with Louis carting away the small boulders on Beacon Keithley. I saw Mr. McTeigh in the field Hill. The ground appears as though hogs back of his house. Keitnley went down the had been rooting over it. But the wicked field to shoot a blue-jay. Mr. McTeigh came part of the transaction is that the carras- and "bollered" to us, and then Keithley came the sepulchres of possibly an extinct race- up from the field. The prosecutor said we Hill—have been invaded by the Vandal and was a chicken on the fence, and we had better the boulders carried away. There are some shoot that; he also said he would come over twenty or thirty cairns on and around Beacon there and break our d-d necks with the gun. Hill, and if left undisturbed, would always Keithley fired off his gun in Pembroke street; add to its interest without marring its beauty. I didn't know anything of the city limits at But if no check be put on parties carrying the time. The cause of the threat was that away the boulders, the cairos, one and all, we said it was none of his business; he was

N. P. RAILROAD PROGRESS.—The Kalama Mr. Bishop—I'd call your Worship's attention to the 22d inst. contains the following :- Grading on the southern end of the 25-mile contract is about finished. The road from Kalama northward is ready for the ties the accused as far as two miles below Carrollton (six miles), where there is a small gap to complete, which joins eight miles more of fin ished grading; this gap will be closed in about two weeks. Northward toward Toutle the line is in detached stages of progression ; but as the force upon the work is rapidly concentrating upon the Cowlitz, seven or eight hundred hands working at a narrow point of the route, with seventy scrapers and a large number of teams, the work closes very fast. We learn that track-laying will

commence on next Monday. THE FRENCH ADVERTISING TRADE .- This last few years, or, at least, has not kept pace with the increase of general business. However, if commercial prosperity is to be guaged by the number of newspaper advertisements, the commercial barometer must be very low in Paris. Whereas formerly the third and fourth pages of the leading daily papers were entirely taken up by trade advertisements, we now find only about five or six small anserge. onces Anglaises (i. e., on the English uniform ystem) in the last column of the last page, and these are of the usual therapeutic deas the dividends of the Paris papers are chiefly derived from advertisements.

A Big FAMILY .- The New York Express says about 3,000 members of the Howe family met at Farmington, Mass., Thursday, to eat, drink and make one another's acquaintance. Delegates from nearly every State in the Union, and from South America' presented claims to the title of Howe. It is mystery how so many Howe's got together, but somehow they did. But, how would it should one of this Howe family be elected President? Would be grant each an office? Echo answers...." How could it be otherwise."

DR. CHING FUN-A CARD-EDITOR

ETANDARD:—Through the medium of your
paper I want to state the very great good that has been
done me by Dr. Ching Fun of this city, nxet door Kwong
Lee & Co. For 24 years I suffered with neuralgia on
the brain, which baffied the skull of three first-class
American physicians. Latterly bronchitis attacked my
right img, and my eyes became awfully inflamed. Dee
pairing of ever being cured I placed myself as a last resept in the hands of Dr. Ching Fun, and after five months
treatment I am a well man and feel that I cannot sound
the eminent Chinese gentleman's praises too loudly, o
that all my countrymen similarly affecteed may visit
and find relief, Respectfully,
